Education

Staffordshire University

MSc Software Engineering

- Multi-tier Application Architecture, Web Application Programming, Pervasive Computing

Stoke-on-Trent

Feb. 2023 – May 2024

University of South Asia

Masters in Computer Science

- Software Engineering, Databases, Object-Oriented Analysis and Design

Lahore

Aug. 2015 – May 2017

Experience

Full Stack Developer

June 2018 - February 2023

Averox Solutions

London, England

- Designed and developed scalable web applications using modern technologies such as React, Node.js, PHP, Zend, and Docker.
- Collaborated with social media APIs to create innovative solutions for business and marketing tools.
- Optimized backend performance, implemented REST APIs, and maintained database systems (MySQL, MongoDB, Prisma).
- Leveraged cloud infrastructure (AWS S3, EC2) for scalable and reliable application deployment.
- Delivered seamless user experiences by integrating advanced technologies and ensuring cross-platform compatibility.

Frontend Developer

Sep 2017 - June 2018

Skylite Networks

Lahore, Pakistan

- Designed and developed responsive, mobile-first websites compatible with iOS3+, Android devices, and all major browsers.
- Converted PSD designs into clean, functional HTML5/CSS3 markup.
- Analyzed client requirements, estimated project timelines, and prepared detailed plans.

Projects

Bleupage | Php, Zend, MySQL, AWS, Rest API's

Worked on various social media APIs (Facebook, Twitter, Instagram, LinkedIn, YouTube, Google Plus, Pinterest) and technologies (PHP, JavaScript, Zend Framework, Laravel, React.js, Node.js). - Bleupage: Developed a social media management platform with PHP, Zend Framework, SQL, MongoDB, and AWS. (<https://bleupage.com>)

- Developed a unique social media management platform tailored for businesses to achieve marketing goals.
- Integrated APIs, optimized performance, and maintained database systems using Zend Framework and AWS.

Averox Leads | Node.js, Express.js, React, Docker, Prisma, and AWS S3

- Designed a lead generation tool integrating Google Maps and Facebook data.
- Utilized modern tech stacks, including React and MongoDB, to deliver a seamless user experience.

Dev Portal | Node.js, React, PostgreSQL, MongoDB, JWT

- This is a MERN stack application that includes a social network app that includes authentication, profiles and forum posts. (<https://github.com/fary58/dev-portal>)

Technical Skills

Languages: JavaScript, PHP, SQL, C/C++, HTML5/CSS

Frameworks: & Libraries: React, Node.js, Express.js, Redux, Laravel, Zend, WordPress, Tailwind CSS, Mongoose

Technologies: Frontend, Backend, ES6, REST APIs, AWS, Firebase, SaaS, GraphQL, Front-End, Postman

Databases: MongoDB, SQL, PostgreSQL, Sequelize

Developer Tools: GitHub, Docker, Prisma, AWS S3 & EC2, IntelliJ, VS Code, Postman, CI/CD, NPM, AGILE
