EDUCATION

Mobile Application Development Brototype

2023 – 2024 | Kochi, India

BCA Graduate

University of Calicut

2014 – 2017 | Thrissur, India

SKILLS

Proficient in Flutter framework

- Dart programming
- API integration
- Hive
- Sqflite
- Firebase
- BloC
- Getx
- Provider
- Data Structure and Algorithm
- Git
- Figma
- HTML
- CSS

MINIPROJECTS

Student Management App-Bloc

- Developed a student management application using Flutter for the front-end interface and Golang for the backend API integration. Implemented CRUD operations for managing student profiles, including personal details

Netflix Clone

- Implemented a user-friendly interface design that closely resembles the Netflix App.
- Utilized RESTful APIs to fetch and display streaming content dynamically

PROFILE

A self-taught Flutter Developer with a strong passion for mobile app development, specializing in Flutter and proficient in Dart programming. With solid hands-on experience gained through personal projects and self-directed learning, there is a demonstrated exceptional dedication, adaptability, and a commitment to excellence in the dynamic field of app development. Eager to leverage skills and creativity to make meaningful contributions in a professional Flutter development role.

PROJECTS

Social Media Application [🔗](#)

LinkHub

Designed and developed LinkHub, a social media application utilizing Flutter for the front-end and Go (Golang) for the backend. My responsibilities encompassed ensuring smooth communication between the Flutter front-end and Go backend, thereby optimizing performance and enhancing the user experience.

- User authentication and authorization (OTP Verification included)
- Profile management: Developed features for users to create, edit, and manage their profiles, including profile pictures, bio, and contact information.
- Social networking features: Integrated functionalities such as posting, liking, commenting.
- Search and discovery: Created search functionalities to help users find and connect with other users.
- Messaging and communication: Developed messaging features for private conversations between users, including real-time messaging.

Health Reminder Application [🔗](#)

WELL ALERT

Developed a fully functional health reminder application using Flutter Framework and Hive database, designed to help users track and manage their health-related tasks and to set reminders

- Implemented Medicine Reminder Functionality
- Integrated different Healthy Diet Information and weekly meal plans according to diet
- Included water intake reminder functionality
- Utilized Flutter's notification features to implement reminder notifications for users.
- Medicine Consumption History and water Consumption History
