English

Urdu

PROFILE

Passionate DevOps Engineer with foundational experience in Linux (Ubuntu, CentOS), AWS, and Azure. Familiar with Docker containerization and basic monitoring tools like Prometheus and Grafana. Strong problem-solving skills and eager to learn and grow in a junior DevOps role, contributing to infrastructure reliability and automation.

WORK EXPERIENCE

Motive Formally Keeptruckin DevOps Engineer

25.07-2024 - Present

- Automated Infrastructure Management – Deployed and managed scalable cloud infrastructure using Terraform, Kubernetes (EKS/GKE), and AWS/GCP services.
- CI/CD Pipeline Implementation – Built and optimized Jenkins/GitHub Actions/GitLab CI/CD pipelines to automate software builds, testing, and deployments, reducing release cycles.
- Monitoring & Incident Response – Implemented Prometheus, Grafana, ELK/EFK Stack, and Datadog for real-time monitoring, logging, and alerting, improving system reliability.
- Security & Compliance – Enforced IAM policies, RBAC, and automated security scans to ensure infrastructure security and compliance with industry standards like SOC 2 & GDPR.
- Performance Optimization & Cost Efficiency – Optimized auto-scaling, resource allocation, and cloud spend, reducing downtime and cutting infrastructure costs.

Motive Formally Keeptruckin Operations Coordinator

31.05-2021 - 24.07-2024

- Coordinated product and service operations, ensuring quality and consistency in delivery.
- Managed Service Level Agreements (SLAs) to ensure timely and accurate service delivery.
- Monitored SLA metrics, identified areas for improvement, and implemented solutions to maintain compliance.
- Collaborated with cross-functional teams to troubleshoot and solve product-related problems.
- Coordinated projects related to product updates, service enhancements, and new service launches.

Corvitt

15.11-2023 - 16.05-2024

DevOps Internship

- Assisted in CI/CD pipeline automation using Jenkins/GitHub Actions to streamline deployments.
- Worked with Docker & Kubernetes to deploy and manage containerized applications.
- Monitored system performance using Prometheus, Grafana, and ELK/EFK Stack.
- Gained hands-on experience with AWS/GCP cloud infrastructure and security best practices.
