

WORK EXPERIENCE

- Oneiro, Remote • Junior Cross Platform Developer
 - Led project management, including the creation of execution plans and Entity Relationship Diagrams (ERDs) for databases.
 - Developed backend solutions and contributed to mobile app development.
- Wenawa, Karachi • Android App developer Intern
 - Utilized Flutter for Android App development, creating Proof of Concepts (POCs) and Minimum Viable Products (MVPs) for clients.
 - Performed software re-engineering, configuration, and setup for legacy projects.
 - Implemented Continuous Integration Continuous Deployment (CI/CD) for Laravel projects.
 - Conducted manual server deployment.
- Freelancing, Remote • Software Developer
 - Created business software and client solutions using various tech stacks.
 - Utilized Flutter for desktop to create a Customer Relationship Management (CRM) solution.
 - Used .Net Winform to develop a scheduling desktop application.

EDUCATION AND TRAINING

- 2025, Bachelor of Science, Software Engineering, MAJU
- 2024, Flutter Development, Jawan Pakistan
- 2024, MERN Stack Development, Jawan Pakistan
- 2023, Flutter Developer, Freecodecamp
- 2023, Introduction to Mobile Application Development, Coursera (Meta)

TECH SKILLS

- MERN Stack
 - Next.js
 - HTML, CSS
 - JavaScript
 - JAVA, C#, C
- Flutter & Dart
 - Serverless Functions
 - Asp.Net (Entity Framework and MS SQL)
 - AWS (RDS, EC2, Lambda)
 - Node JS (Express.js and MongoDB)

PROJECTS

- Nextop GPS
 - Enhanced the “Nextop GPS” app using Flutter, which now features advanced vehicle tracking through a Traccar server on Contabo.
 - Successfully deployed the app on the Play Store and App Store using CI/CD, enabling users to track vehicle locations live.
- Promptopia
 - Launched a project built with Next.js, MongoDB, and Tailwind CSS, featuring Google Authentication for sharing AI prompts/responses.
 - The website utilizes OpenAI to generate prompts for posts.
- STE SANBETON Company Desktop Application
 - Produced a custom desktop app for STE SANBETON company using Flutter, PHP API, and MySQL to improve operations and connect to weighing scale hardware.
 - The app encompasses features like order management, real-time updates, ticketing, quotes, transaction tracking, invoicing, inventory management, all within a secure, role-based access framework.
- Eventscape
 - Developed “Eventscape”, a Flutter and Firebase Firestore based event management app with Email/Google Authentication.
 - It enables user participation, ticket purchasing, event addition, budget management, and performance monitoring via a dashboard.
- Wellness Session Scheduler
 - Developed a “Wellness Session Scheduler” using Winform .Net framework and Microsoft SQL Server that automates various aspects of coaching program management.
 - The system handles scheduling, coach assignment, headcount management, CRUD operations, and facilitates data export to Excel.
