Objective

I am a committed software engineer with hands-on experience in web, mobile application and software development. Proficient in JavaScript frameworks like Angular, React and Node.js, I have a strong background in building efficient APIs and enhancing database performance. I thrive in collaborative environments and derive satisfaction from delivering high-quality software solutions.

Summary

- 2.5 year of experience development.
- Developed multiple Software development using Angular/React as the implementation framework.
- Hands on experience with developing and maintaining Angular/React front end websites.
- Highly self-motivated and enthusiastic professional.
- Actively involved in the design and application architect.
- Currently working as a Full Stack Developer at Bizsoft Solution pvt.Limited.
- Bachelor in Computer Science.

Skills

Programming & scripting Languages	JavaScript, ES6, JSX, TypeScript, HTML, CSS, SCSS, JAVA, C#, C++
Development Framework/Libraries	Angular, ReactJs, Redux Toolkit, web API, Nodejs, Asp.Net
Data Base Server	MySQL, SQL, mongodb, firebase db
Development Tools & IDEs	VSCode, Visual Studio, WebStorm
Other Tools	Github, Gitlab, Jira

Experience

Bizsoft Solutions Pvt.limited, karachi, Pakistan

Software Engineer

(February-2023 – present)

Software Developer (Angular WebAPI , SQL (Views, Store Procedure)

Key Responsibilities:

- Led the development of web-based software using Angular, .net, managing the full development lifecycle from requirement gathering to development
- Developed RESTful APIs with WebAPI, ensuring seamless integration between front-end and back-end system
- Worked with Angular, React, and ASP.NET to develop and enhance web applications.
- Enhanced database performance by creating SQL views and stored procedures, significantly improving query execution times and system efficiency.

TkLogics, Lahore, Pakistan (Remote)

Mobile Application Developer
(June2023 – November2023)

I worked as a application Developer on various applications, contributing to both critical and creativeprojects.

Key Responsibilities:

- Worked on improving the app's user interface to enhance usability and user experience.
- Received and executed design specifications to implement changes on the website.
- Focused on integrating design updates to improve the site's appearance and functionality.
- Coordinated with design and development teams to achieve seamless and effective updates.

Bizsoft pvt.limited, karachi, Pakistan

Intern Software Engineer
(August-21 – February-22)

I was hired as an intern where I started working on The Ongoing Development. Later they hired me as a full stack developer (ANGULAR,.NET CORE and .Net WebApi)

Key Projects

Admin Dashboards – Bizsoft pvt.Limited

Developed a product-based dashboard leveraging Angular, TypeScript, and .Net, focused on delivering comprehensive insights across HR, production, export, sales, and costing. Spearheaded seamless API integration for dynamic data retrieval, ensuring smooth, high-performing front-end functionality and an interactive user experience tailored to business needs.

Roles & Accomplishments

- Led the front-end development using Angular and Typescript, ensuring a highly responsive, visually engaging, and user-friendly interface across all devices.
- Integrated APIs with advanced data handling techniques to enhance performance and deliver real-time, dynamic content with minimal latency.
- Implement efficient state management using NgRx, optimizing data flow and reducing API calls for improved performance.
- Utilized lazy loading for module-based components, significant reducing initial load time and enhancing the overall user experience.
- Applied reusable components and services to streamline code, improve maintainability, and ensure scalability across the application.

FMIS(Financial Management Information System) – Bizsoft pvt.Limited

Contributed to the development of an intermediate-level Financial Management Information System, primarily focusing on the frontend using Angular, with ASP.Net for the backend. Led the creation of intuitive user interfaces, ensuring seamless integration with backend services and optimizing performance for efficient financial management.

Roles & Accomplishments

- Optimized application performance, focusing on fast load time and seamless user interactions, enhancing overall system efficient.
- Collaboration with back-end teams to ensure seamless API integration, enabling smooth data transfer and enhancing the accuracy of financial and analysis.
- Implemented responsive design principles to ensure a consistent and optimal user experience across various devices and screen sizes.
- Enhanced code maintainability by creating reusable components and service, ensuring scalability and ease of future development.

Pak Loader – TkLogics

Developed the Pak loader app from scratch using React Native, prioritizing modern UI/UX design and API integration with Redux Saga for efficient state management. Conducted rigorous testing to ensure app stability while collaborating closely with cross-functional teams to meet project goals. Managed source code with Git, facilitating effective collaboration and version control.

Role & Accomplishments

- Integrated multiple APIs for dynamic data retrieval, utilizing Redux Saga for efficient management of side effect and asynchronous operation.
- APIs implemented Redux for state management, improving performance and ensuring maintainable, scalable code across the application.
- Debugging, ensuring app stabilities and resolving issues for a high-quality, bug-free user experience.
- Managed source code using git or github, enabling effective version control, smooth collaboration, and streamlined development processes.

Education

IQRA University, Karachi, Pakistan

Bachelor Program in computer Science

Year: 2019 - 2022

Interests

Research on Latest Technology

Coding / Development

Nature, Hiking, Fitness, Video game
