SKILLS

AdobeCreative Cloud

Autocad, CorelDRAW

3dsMax, Zbruss, Photomodeler, Inventor

DaVinci Resolve

Unreal Engine

Photografy

MICROSOFT OFFICE SUITE

EDUCATION

An integrated master's degree in engineering from the NATIONAL TECHNICAL UNIVERSITY OF ATHENS (<https://www.ntua.gr/en/>)
This is the best university in my country (NTUA is #1 university in Greece and #347 in the world, according to QS World University Rankings 2024)

and
photography school
3D modeling school
by the same university

I'm an experienced Artist, Engineer, and Inventor with an integrated master's degree.

I could be a remote assistant to you. (photoshop etc)

I could relieve you of unnecessary workload

For full-time work (40 hours per week),
I will be paid 19.000 \$ per year.

I will be a helper - assistant in your team with low cost.
(a win-win agreement because this is a good salary for Greece)

I have founded three start ups and I have made the graphics for them. As an inventor and an artist I can better understand the demands of an entrepreneur or of a client

WORK HISTORY

UNIQUE mouse

This is a start up that deals with computer handling away from an office.

And here I have made the whole sites.

The graphics, the 3D models of the products, the photography, the editing of the images and their video presentations.

GIFT of Life

This start-up was based on my own invention and patent for a completely innovative orange juice product, which Greece has a lot of.

And here I did all the product graphics.

True eyes

Here I was photographing successful fashion models from Greece. Then I made 3D copies of them.

This work was very demanding and many digital programs needed to be combined. This work was done with difficulty 10 years ago, where the technology we have today had not yet been developed. Now with the Unreal Engine and the MetaHuman, creating virtual people is quite simple. Also, Daz Studio is a helpful tool.

Also, I did the graphic part of this website.

ADDITIONAL

The last sites I made are the:

www.Leftkeyboard.com

www.uniquemouse.com

as well as their 3D graphics and image processing.

FAMILY

I am married and

I have a 10 year old child

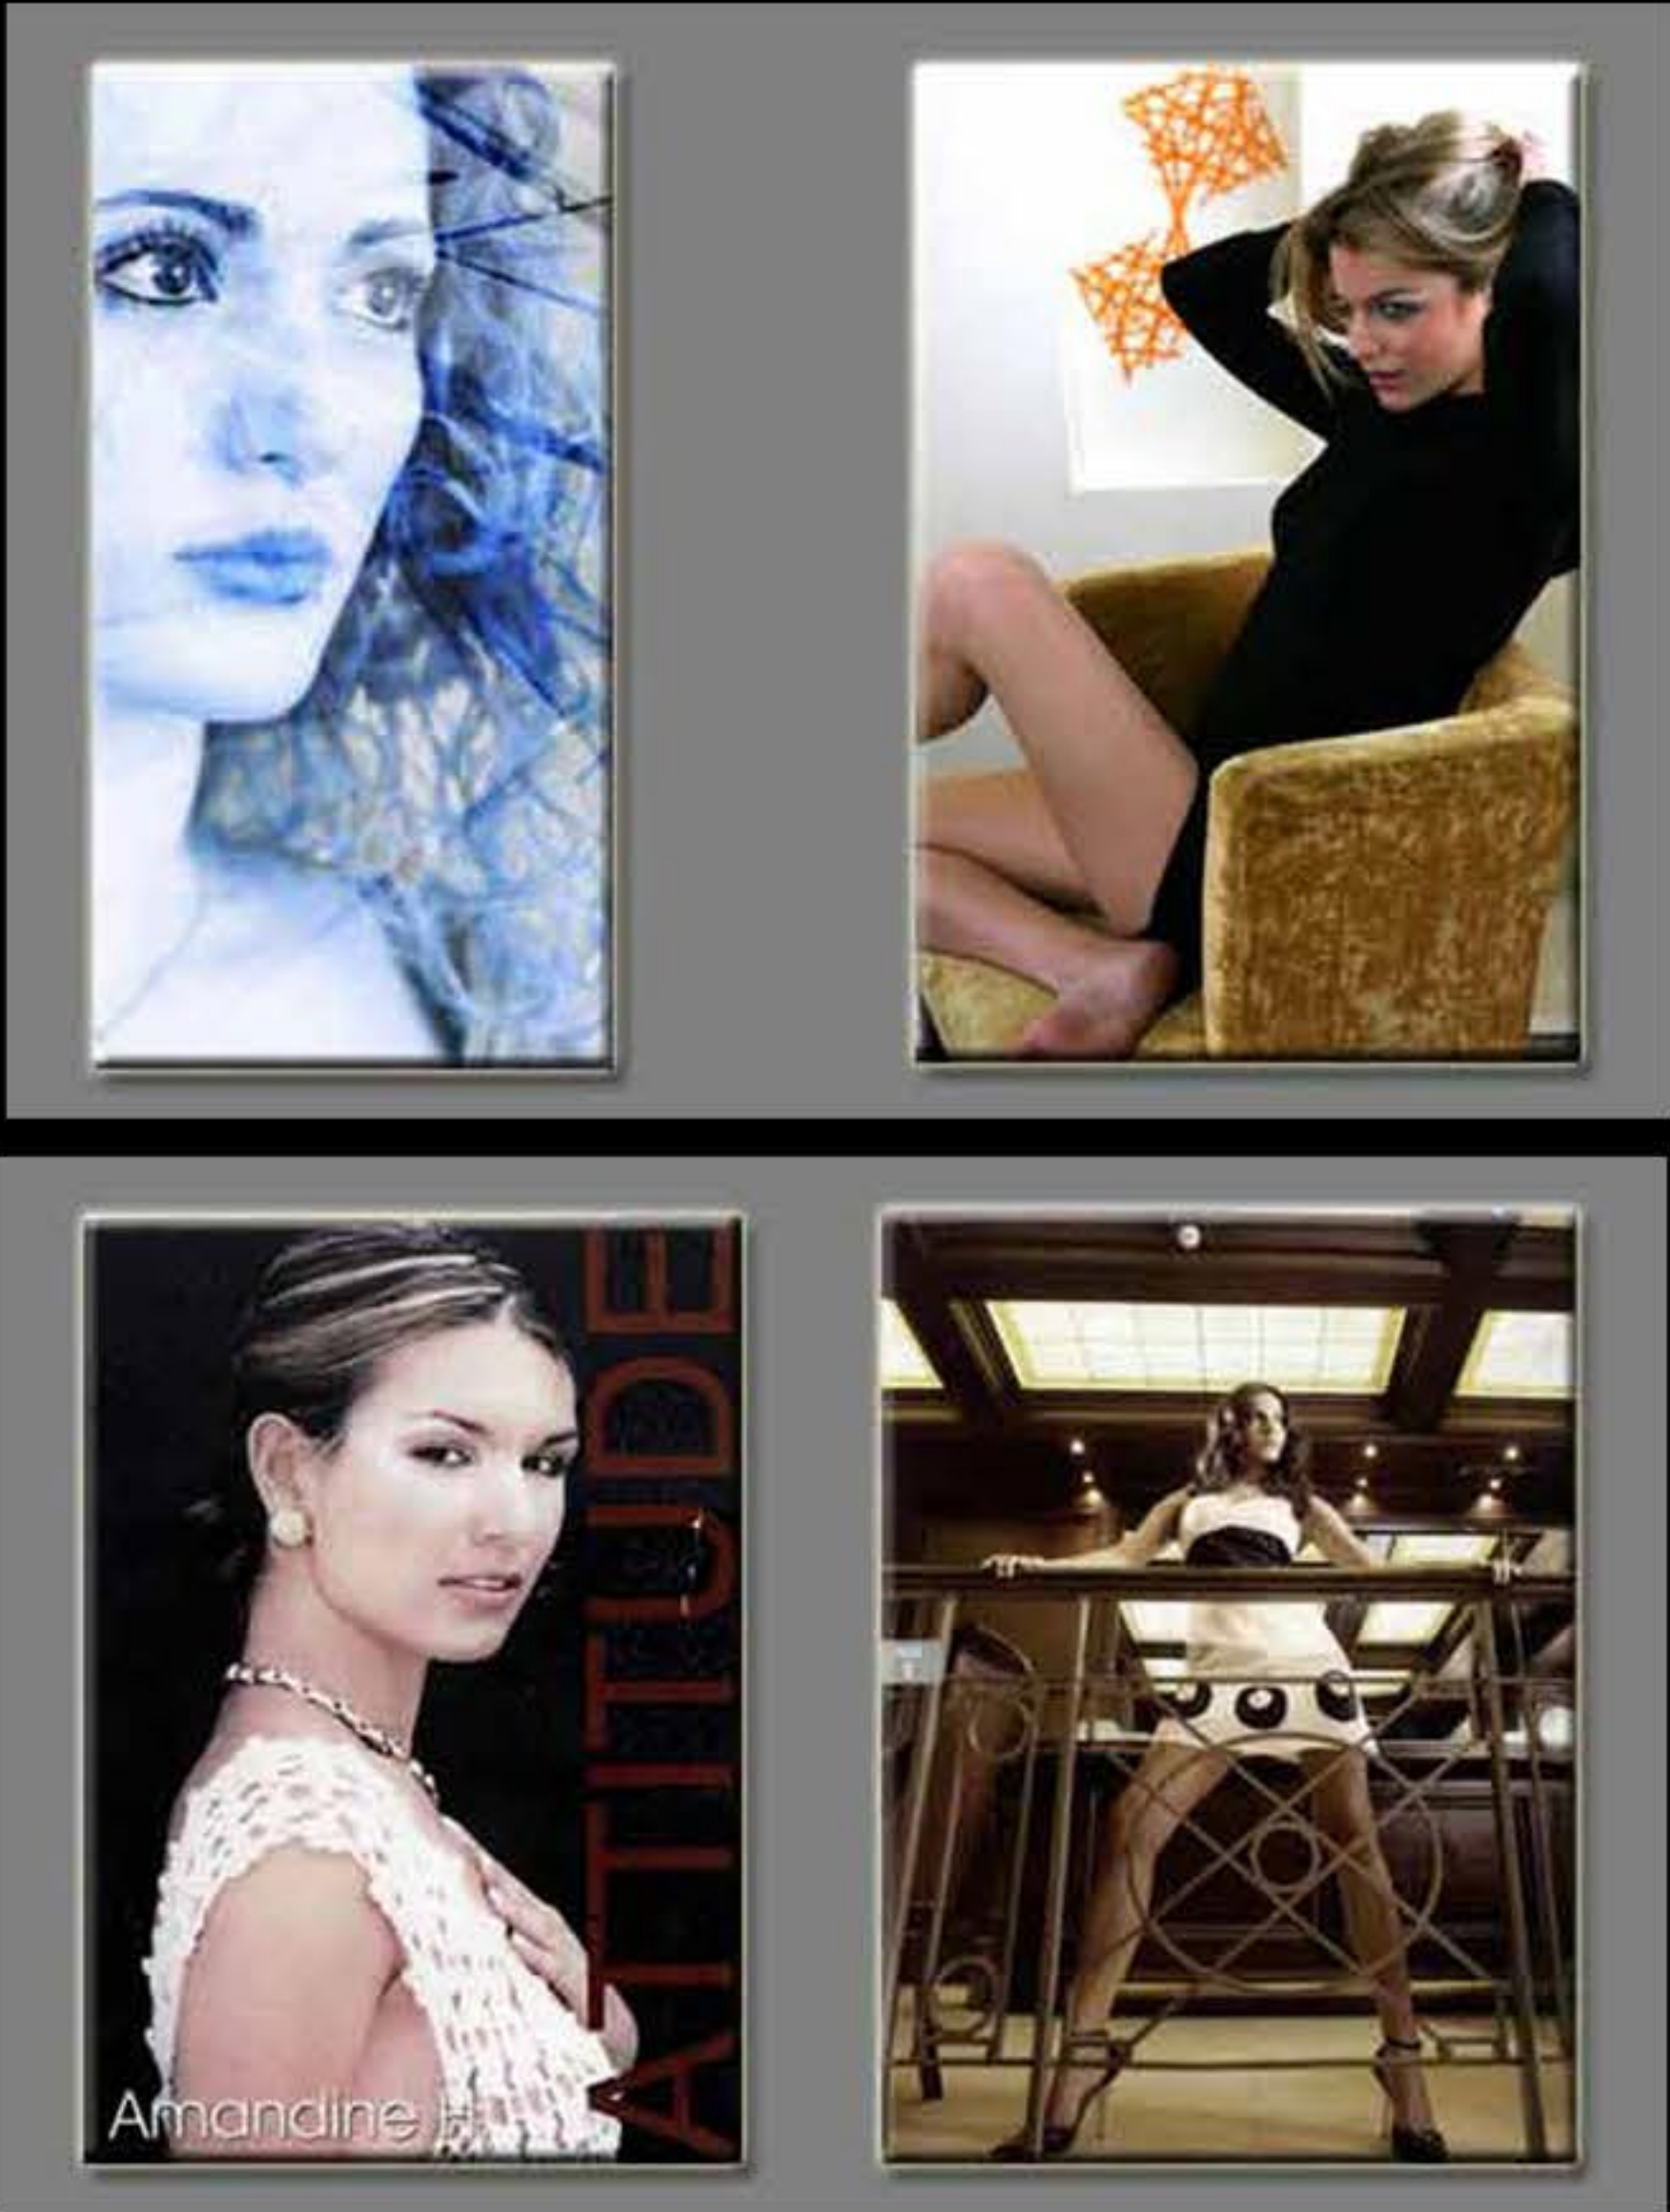

● 3D Product Design

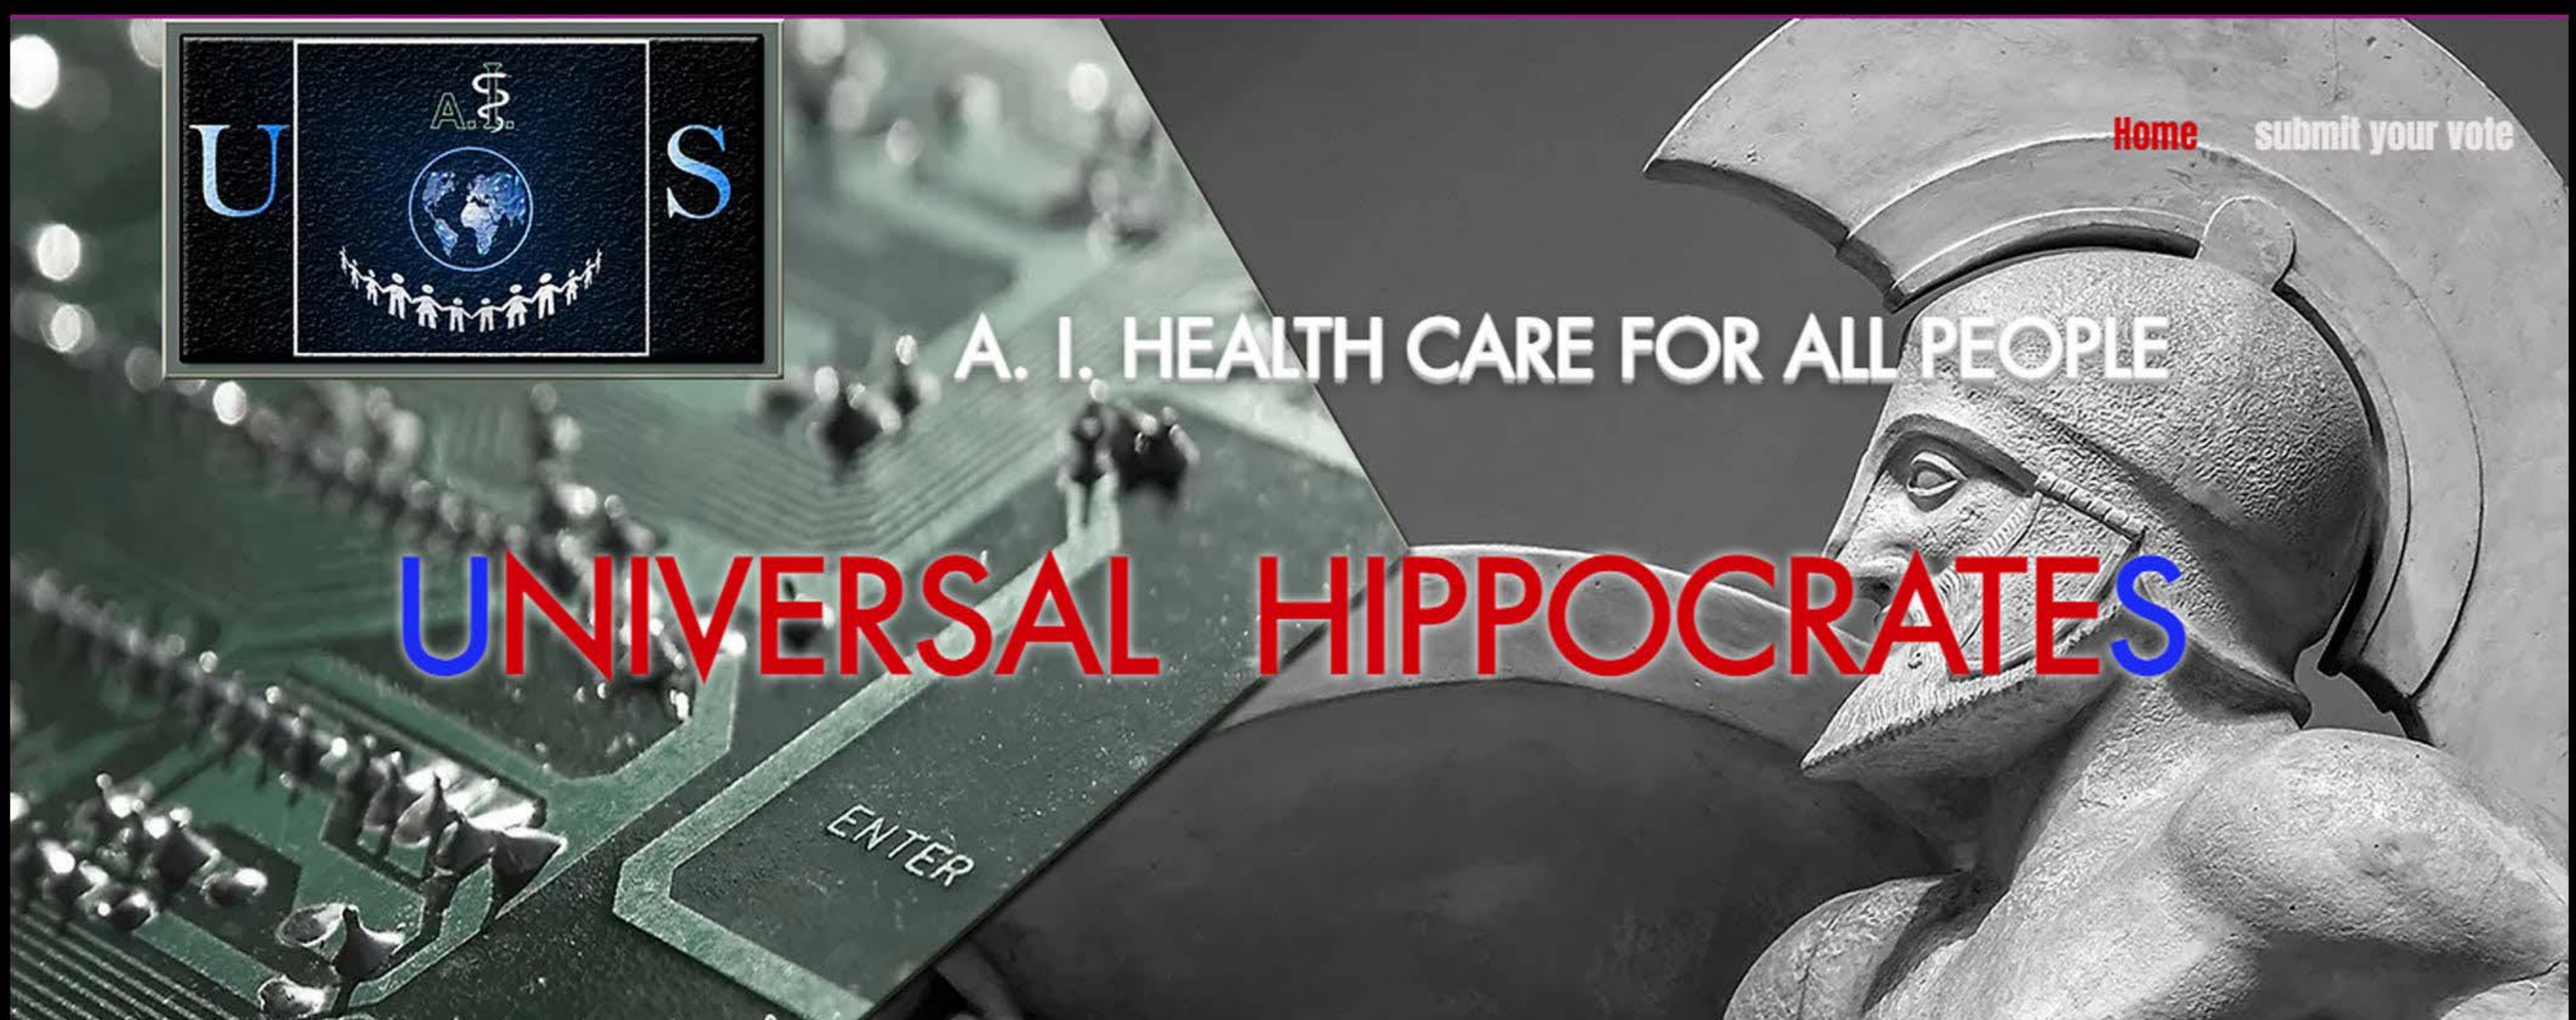

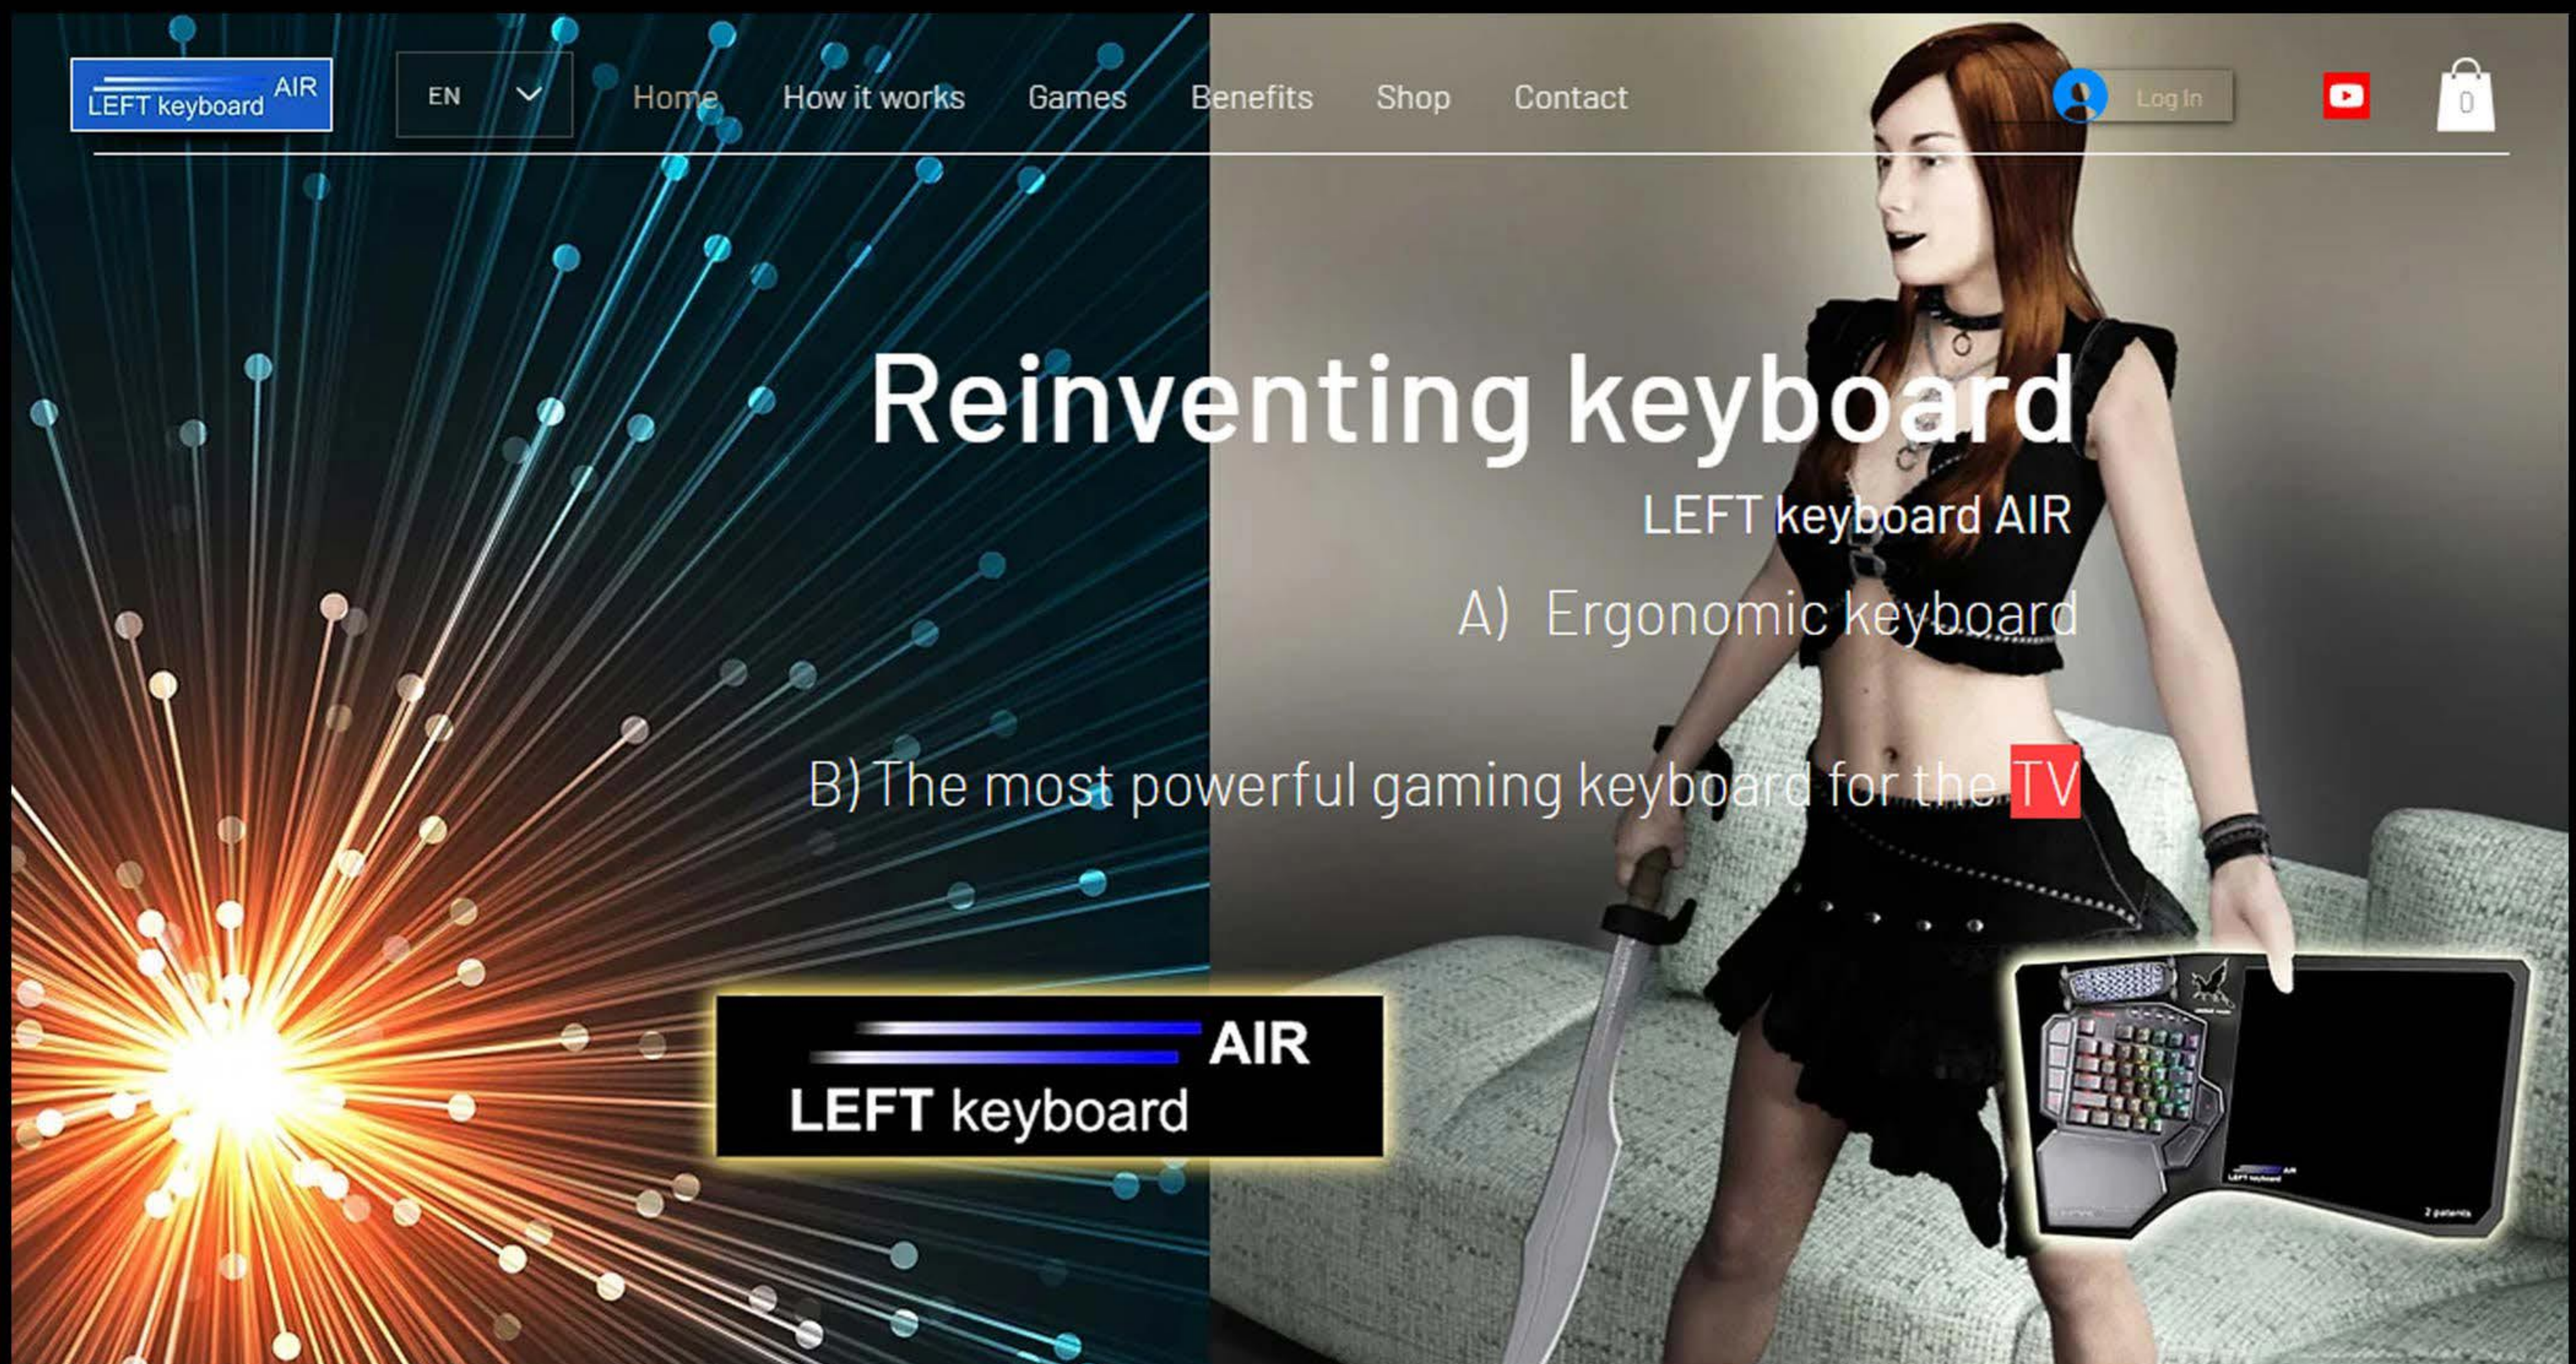

- invisible mouse
- The couchpad is revolutionary**
- Now you can play all computer games on your TV.
 - Now you can handle all the computer applications on your TV.
 - You can play or work from the comfort of your couch

The couchpad combines the classic mouse and the keyboard on a device for TV
but in a unique way
The couchpad gives a very subtle ,a very delicate and elegant way
of handling the computer to tv.

● 3D modelling
