## PROJECTS

### ◆ **Task and Time Management system** (Product: Asp.Net, SQLServer, Angular) **(CURRENT)**

Role: Manager, Developer

### ◆ **VIN Tracking** (Project: Asp.Net, SQLServer)

Role: Lead Developer and Manager

- Lead developer on the project and had built it from scratch
- VIN tracking was done where the VIN details were entered manually into the system and thereafter levels of process were carried out to further move the VIN.
- Client requirement was also to extract the VIN details from a server by parsing the XML file available.
- API for mobile end was also developed.

### ◆ **Audit Report System** (Project: Asp.Net, SQLServer)

Role: Lead Developer and Manager

- Lead developer on the project and had built it from scratch
- Web Auditing system to manage audits on the basis of questions that were managed by the admin.
- API for mobile end was also developed.

### ◆ **Automobile Portal** (Project: Ruby on Rails, MySQL) **(CURRENT)**

Role: Lead Developer and Manager

- This was handed over from an existing developer but it required major theme revamp.
- Notifications using rPush was integrated into the system
- APIs were also managed alongwith a requirement where similar sets of responses need to be generated for a different sub-product used by the same client.

### ◆ **Event Web Portal** (Project: Ruby on Rails, MySQL)

Role: Team Member

- Manage events from unstructured and structured websites and consolidate all the duplicate events into one.
- Manage brands and retailers and provide them the best matched events on the basis of their business objectives and event categories.

### ◆ **E-Commerce API** (Project: Loopback.Js, MySQL)

Role: Team Member

- Shopping cart application with wardrobe availability

- Register , login and basic CRUD operations
- Product management and Admin Panel API
- Filter API's into the product panel.

#### ◆ **Server Management**

- For a duration of 6 months have provided support on AWS to a company involving disk cleanup, EC2 deployment, URL redirection through config changes, RDS scaling, CLI troubleshooting.

## **PROFESSIONAL TRAINING**

- ◆ ADCA certification from CICET, Lucknow
- ◆ 4 weeks summer training on Networking in RTTC BSNL, Lucknow
- ◆ 3 months training on ASP.NET MVC 5 at Tech Fame, Lucknow
