### OBJECTIVE

Driven and detail-oriented Front-End Developer with almost one year of practical experience in developing responsive, user-focused web applications. Adept at delivering clean, efficient code and optimizing user interfaces for seamless experiences. Looking to leverage my technical expertise and passion for innovation in a dynamic environment, while continuing to enhance my skills and contribute to cutting-edge projects.

### SKILLS

CSS HTML JAVASCRIPT

GITHUB REACT.JS REDUX

TAILWIND CSS REDUX SAGA

### EDUCATION

#### Bachelors (B.S - Software Engineering)

Sir syed university

01/2018 - 01/2022

#### Intermediate (H.S.C- Pre Engineering)

Iqra Huffaz Boys college

01/2016 - 01/2018

#### S.S.C (Science Group)

Iqra huffaz secondary school

01/2014 - 01/2016

### WORK EXPERIENCE

#### MERN Stack Intern

CLOUDLOGICALLY

12/2023 - 08/2024

- Developed strong expertise in writing clean, optimized code for scalable front-end development while occasionally contributing to back-end tasks.
- Played a pivotal role in the "SkillGigs" project, overseeing feature-specific tasks and ensuring seamless functionality across both the Employer and Talent platforms.
- Implemented **Redux-Saga** to streamline data management and enhance state handling efficiency, optimizing workflows such as function-based payload dispatch.
- Utilized **React.js** and **Ant Design** components to design and build intuitive, responsive user interfaces, significantly elevating user experience and improving overall interface performance.

#### SQA Intern

CATCOS (PVT.) LTD

04/2023 - 06/2023

- Worked as a Software Quality Assurance SQA tester, focusing on manual testing
- Responsible for manual tests on the Monkey Shu website to identify and report bugs, ensuring high quality releases

### PERSONAL PROJECTS

#### MechShop-(E-Commerce App)

- Developed a fully functional online shopping application using **React.js** and **Tailwind CSS**, delivering a modern, responsive design optimized for desktop platforms.
- Integrated third-party custom components, such as **Sweper.js**, **Toaster** and **Router**.
- Implemented core e-commerce features, including product filtering and Search Bar, ensuring smooth and intuitive navigation throughout the application.
- Connected **Firebase** for secure user authentication, enabling seamless user sign-up, login, and contact form.

#### Weather App

- Developed a weather application using React.js to display real-time weather data based on user location.
- Integrated third-party customized components like product section and interactive modals to enhance user experience and streamline product browsing.
- Implemented essential e-commerce features including product filtering and a dynamic shopping cart for smooth navigation.
