vladislavkovpak1@gmail.com | +1(818)575-0810 | Los Angeles, CA

EDUCATION

Taras Shevchenko National University of Kyiv

Bachelor of Information Systems and Technologies

Kyiv, Ukraine

September 2020 – June 2024

EXPERIENCE

Junior .NET Developer

Izzi Studio

Kyiv, Ukraine

February 2023 – Present

- Developed and maintained .NET services to monitor vending machine telemetry and manage errors in real-time, improving system stability
- Integrated Google Sheets API for automated error logging and Telegram API for sending instant notifications to support teams, speeding up issue resolution
- Designed and optimized PostgreSQL databases to handle large volumes of telemetry data, improving data access and storage efficiency
- Utilized Docker for containerization, ensuring smooth deployment and scalability across different environments
- Collaborated with the team on Git for version control, contributing to code reviews

PROJECTS

PayMax | .NET, PostgreSQL, Docker, Phinx, JSON, API

Expanded the functionality of an existing .NET-based platform by developing new controllers and enhancing vending machine telemetry management. Provided technical support for system maintenance, interacted with clients to address issues, and integrated API services to improve system capabilities. Worked with JSON for data serialization and deserialization, and utilized Excel for generating reports and data exports. Utilized PostgreSQL for data storage and Docker for deployment.

SKILLS

Languages: .NET, JAVA, SQL (PostgreSQL), PHP, JS, HTML/CSS

Frameworks and libraries: ASP.NET, Entity Framework, JUnit, NUnit, Spring Boot, React, NPOI, Newtonsoft.Json, LINQ

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, JetBrains Rider, IntelliJ, Postman, DbGate

Databases: PostgreSQL, MySQL

CERTIFICATIONS

Cisco Certifications
