Mobile: 424-537-2559

 <http://www.linkedin.com/in/leahdacua/>

I bring years of experience and diligence to handle testing needs of large and complex software products. Willing to learn and be trained in any job that may or may not be directly related to my previous work experience.

SKILLSET

- Software Testing, Requirements gathering and analysis, Test case design
- Defect detection (Functional/UAT), Tracking, and Documentation
- Jira, Zephyr, Microsoft Test Manager, Visual Studio, TFS, SoapUI, JOSM
- ETL Testing (Data Warehouse): Talend Studio, TAC, Nexus, Informatica Power Center
- Database: MS SQL Server, Oracle (Oracle SQL Developer)
- Agile and CMMI5 standards
- International work collaborations

WORK EXPERIENCE

ROADDB TECHNOLOGY (CHENGDU) CO., LTD

June 2018 – Oct 2022

Software Test Engineer

Project: ROADDB

RoadDB provides a software solution for road data and localization for automated driving products (SAE Level 2+ to Level 4) in consumer vehicles. RoadDB also supports SAE Level 1/ 2 products such as lane centering, extended versions of automatic emergency braking (AEB), and stop-and-go adaptive cruise control.

Responsibilities:

- Customer communication – answer inquiries, give trainings for end-to-end process
- Continuous Integration testing – analyze result from the daily automated tests, bug tracking
- Design new test cases using real world scenarios
- Create road skeletons and prepare test data for different regions
- Prepare documentations; help other teams to translate their documents to English for international use
- Tools: Docker, Google Earth Pro, JOSM, Bamboo, Jira, Zephyr, Confluence

BLEUM INC.

Sept 2012 – Apr 2018

Software Test Engineer

Project: NEWGISTICS ETL MIGRATION

Warehouse, fulfillment and returns company ETL migration from Informatica to Talend

Responsibilities:

- Customer communication – gather and analyze requirements, create reports and daily updates
- Create mapping documents, Prepare test plan, Review test coverage with client, Perform UAT
- Create builds and deployment/release tickets
- Tools: Talend Studio, TAC, Nexus, Informatica Power Center, JIRA, MS SQL Server, Visual Studio

Project: AGILYSYS VISUAL ONE™ INTEGRATIONS AND INTERFACES

Agilysys is a leading hospitality solutions company. The Visual One™ Integrations and Interfaces team is responsible for the web integrations of products under Visual One: Property Management Solution (PMS), Accounting, Spa, and Golf to vRes, v1web, and GolfProWeb, and interfaces with third-party products eg. Online Travel Agencies (OTA), Delphi XML, InfoGenesis, etc. through web and Windows services.

Responsibilities:

- Communicate with customers for requirements, priorities, and issues
- Create test plans and test suites based on requirements
- Set up test environment, execute test cases, find and track bugs
- Web Service/API UAT/certification testing with third-party testers
- Tools: Microsoft Test Manager, TFS, IIS, SoapUI, Storm, Test Complete, JIRA, Confluence

PACTERA TECHNOLOGY INTERNATIONAL LTD

July 2009 – March 2012

Originally HiSoft International Ltd, is a Microsoft vendor company which brought me to work in China.

Software Test Engineer**Project: MICROSOFT VISUAL STUDIO – WEB PLATFORM AND TOOLS (WPT)**

Visual Studio is a suite of component-based software development tools and other technologies for building software applications. The WPT team is responsible for the functionalities to design, build, debug, and deploy websites with Visual Studio, Visual Studio Express for Web, and WebMatrix.

Responsibilities:

- Product module automation-testing. In certain scenarios, with VS Source Safe, SQL Server 2008/2005, and IIS integration. Tools used: Visual Studio, MadDog, Team Foundation Server and Product Studio. Major tasks:
 - Understand product feature requirements and update automated test cases accordingly
 - Create and monitor runs, which include identifying and fixing machine and setup issues
 - Execute servicing runs to check for compatibility issues with other Microsoft applications, hotfixes and updates
 - Analyze failures, identify, log and track bugs
- Performance testing: configure machine, gather end-to-end data and profiler traces for client, and send daily report of RPS runs to the client. Tool used: Performance Diagnostics Tool
- Manual testing of Azure portal, marketing and billing websites
- Work directly with, and do odd jobs for Venus performance team
- Globalization and localization testing of Microsoft Web Matrix and IIS Express
- Test on different Microsoft operating systems and supported languages

COLLEGE EDUCATION**Ateneo de Davao University, Philippines**

- Bachelor of Science Major in Computer Science
