OBJECTIVE

A detail-oriented and highly motivated Software Quality Assurance Enthusiast with a focus on ensuring high-quality deliverables. Seeking an internship position to apply my knowledge of test planning, execution, and reporting to help deliver bug-free software solutions. Passionate about learning new testing techniques and improving overall software quality.

LEARNING PROJECTS

Drinking Water Supplier App Test Cases   Link

- Created and executed test cases to simulate the customer and supplier workflows for a water delivery service.
- Covered key functionalities such as order placement, delivery tracking, and supplier management to ensure app performance.
- This project provided hands-on experience in identifying functional bugs and improving user experience.

Posting App Test Cases   Link

- Developed test cases focused on the social media posting feature, which includes uploading posts, likes, and comment interactions.
- Enhanced understanding of how different user actions impact app stability and functionality in a real-world scenario.

Shopify Test Cases   Link

- Tested e-commerce store functionalities including payment gateways, product catalog, and inventory management.
- Learned the importance of user flow testing, ensuring smooth user journeys from product selection to payment completion.
- Practiced writing test reports and communicating issues to mock development teams for resolution.

Wikipedia Test Cases   Link

- Developed test cases for Wikipedia's editing and browsing features. Gained hands-on experience in testing user-generated content.
- Focused on testing the robustness of the article editing process and ensuring data consistency during updates.
- This project enhanced my attention to detail and taught me how to assess the impact of multiple simultaneous user interactions.

EDUCATION

Iqra University   Karachi, Pakistan
Bachelor of Science in Software Engineering   *Graduation: 2024*

TECHNICAL SKILLS

Testing Tools: Postman, JIRA, TestRail, Bugzilla
Other Skills: Test Case Design, Manual Testing, Bug Reporting, Regression Testing, API Testing, Test Automation
Soft Skills: Excellent communication, Collaboration, Analytical thinking, Attention to detail

CERTIFICATIONS

Foundations of Software Testing and Validation – Coursera

EXTRACURRICULAR ACTIVITIES

Volunteered as a QA assistant in university software development projects, working alongside developers to test application features.

Actively participated in tech workshops and webinars on software quality assurance.
