Teksyo Pvt Ltd
13-Sep-2023 - 10-May-2024

PROJECTS

After Market
Repo link   Live link

A SaaS application that connects aftermarket parts sellers with their customers through a comprehensive product directory. It facilitates product mapping, enabling users to generate invoices and bills for efficient transactions, linking customers, vendors, and products effectively.

Message-app
Repo link   Live link

A platform that enables users to send and receive anonymous messages, allowing for open communication without revealing identities. Users can create profiles, share unique links, and engage in candid conversations, fostering a space for feedback and playful interactions.

Ticket Wala
Repo link   Live link

A SaaS application that connects bus owners with customers seeking to book tickets for their services. It facilitates the management of vendor information, customer bookings, and ticket generation, streamlining the travel experience for users.

SM App
Repo link   Live link

A sleek landing page for a simple social media app, designed using Material-UI (MUI) components. The page features a dark mode toggle, enhancing user experience and accessibility while showcasing the app's functionalities and benefits.
