Skills

C#   .Net MVC   .NET Web API

Rest API   .Net Core   SQL Server

MySQL   Entity Framework

Work Experience

Associate Software Design Engineer (ASDE)

Think Enabled   *November 2023 - Present*

- Developed REST APIs in .NET Core, improving application functionality.
- Used Swagger and Postman for API testing and documentation.
- Integrated APIs with existing applications ensuring seamless operation.
- Utilized Ocelot for API routing and load balancing.
- Optimized MySQL procedures, decoupling application flow.
- Deployed and managed APIs on Windows Server, ensuring reliable performance.

Intern Software Design Engineer (ISDE)

Think Enabled   *October 2022 - October 2023*

- Gained hands-on experience with MVC design patterns.
- Enhanced e-commerce projects, adding new features using .NET MVC.
- Collaborated with senior developers to understand and implement best practices.
- Improved application performance by troubleshooting and resolving issues.

Freelance Developer

2021 - 2022

- Designed and developed custom POS systems for restaurants from scratch, including database schema and application logic.
- Designed and implemented efficient databases using SQL Server.
- Created user-friendly interfaces and robust application logic with C# and Windows Forms.
